MAKE A DIFFERENCE...

Be a part of a national grassroots effort by joining our network of volunteers striving to empower others and make the world a more accessible place.

AMBUCS members are committed to providing Amtryke adaptive tricycles, awarding scholarships to therapists and performing valuable community service.

Those service projects are often small but deeply meaningful projects that go unfunded by government or insurance – such as making homes and playgrounds accessible.

IMPROVE THE WORLD AROUND YOU!

Service to others is what AMBUCS is all about. AMBUCS provides fun, innovative service opportunities for people who want to help their community but do not necessarily have a lot of time to do so.

By working together, AMBUCS volunteers combine their individual strengths and maximize their spare time. As you work with other members, you'll contribute to chapter activities and goals, and you'll learn new skills that can pay lasting dividends in your personal and professional life. Plus, you'll have the opportunity to make valuable contacts and develop leadership skills.

BY GIVING THE GIFT OF MOBILITY & INDEPENDENCE

PROVIDING AMTRYKE® ADAPTIVE TRICYCLES OUR LEADING PROGRAM

All across the nation, AMBUCS chapters raise funds to donate Amtrykes to riders who are unable to operate traditional bikes.

For more than two decades, these specially designed cycles have provided therapeutic benefits to both children and adults, while enhancing their quality of life.

Amtrykes can be hand and/or foot powered and accommodate riders of all sizes, ages and abilities. They help improve fitness, coordination, self-esteem and, most importantly, are very fun to ride!

Our programs enhance quality of life by providing meaningful assistance not funded by government or insurance.

WARNING:
Giving away
Amtrykes causes
extreme happiness in
kids and their parents.
So this program can
be addictive!

SUPPORTING TOMORROW'S THERAPISTS TODAY

Our organization has long believed it is vital to support and inspire future generations of therapists. To date, AMBUCS has awarded over \$9 million to educate physical and occupational therapists, speech language pathologists and hearing audiologists.

One scholarship can go a long way, as the clinical practitioner spends a lifetime enhancing people's mobility and independence. The AMBUCS Scholars program represents the largest single private source of educational grants for therapists in America.
